

What exactly is a MFGA Supporter?

“What we have found out is that MFGA is in many ways the face of Manitoba’s mixed farmer. Most of us are from western-based Manitoba farms in our organization these days. We are from family farms that have been in our families for generations and we have grass front of mind. Most of us run cattle on pasture and rangeland and grow forages for our herds and some of us sell hay too. We water our stock from wetlands on our lands via watering systems, sometimes solar-powered, and as a group we are staunch soil health advocates via grazing practices and cover cropping. Many of us also grow annual crops to supplement our on-farm income.” ~ Dave Koslowsky, MFGA Chair

Farming isn't our job, it's our way of life. We're committed to our families, farms and province and strive to present input and expertise at every opportunity we can muster. Over recent years, we've watched the world circle around the importance of prairie grass to water, carbon, soil and wildlife. We've known those benefits for years. It's part of the reason we farm the way we do. Whether you are a producer, industry leader, conservation group or concerned citizen, help us work toward our vision:

VIBRANT GRASSLANDS AND PROSPEROUS FORAGE CROPS ON MANITOBA'S AGRICULTURAL LANDS.
